Forecast for Wednesday 28 Jul 2021

Weather: Some poor visibility first thing on some western facing slopes, with some sunny spells too. From the outset though heavy and thundery showers will move eastwards through the region, frequently bringing rapidly deteriorating conditions. Into the evening showers will become less frequent and lighter with longer lived dry and sunny spells expected too.

Chance of cloud free mountain/hill tops above 600m: 40% first thing becoming 100% by lunchtime.

Visibility: Poor first thing, particularly on western facing slopes with patchy cloud with bases of around 500m covering some hill tops. Becoming generally good with cloud bases above the summits but visibility will frequently deteriorate to become poor in showers throughout the morning and afternoon. Improving in the evening as showers become more isolated.
